

## Vacuum Filtration Systems VF 205A

### All-In-One Systems

- > Compact and portable design
- > Combines all necessary items for filtration
- > Large variety of filtration flasks
- > Oil-free vacuum provision
- > Easy maintenance
- > Low noise level
- > Manual pressure control
- > Availability of chemical resistant systems

| Product | Content  | Application Area                                  |
|---------|--|---|
| VF205A  | Strong oil-free vacuum pump VF6<br>filtration flask set<br>High-pressure resistant tube<br>0.2 µm water-blocking filter<br>Fiberglass filter membrane fiberglass filter membrane (47mm / 0.1 µm) | Normal filtration<br>Suspended solids measurement |

## Specifications

| Model                          | VF 205A                      |
|--------------------------------|------------------------------|
| Working mode                   | All-In-One Filtration System |
| Power (W)                      | 80                           |
| Ultimate vacuum(mbar)          | 150                          |
| Max. Flow Rate(L/min)          | 34 L/min                     |
| Tube I.D. (mm)                 | 8                            |
| Motor Speed (rpm)              | 1450                         |
| Weight (kg)                    | 7.5                          |
| Noise Level (dB)               | 60                           |
| Contained Filtration Glass Set | VF6                          |
| Order No.                      | 167205A                      |
